

BENMAN[®]

PROFESSIONAL TOOLS

The Evolution of a Tradition

BENMAN TOOLS is the evolution of a family business that started 60 years ago with the production of industrial products and raw material iron. The company with its current form was founded in 1979.

In the beginning the company's main business was the production of no name tools, until 1991 where the first branded line was produced.

Today, after 3 generations of management, the company has a continuous grow in sales, personnel, export countries and product categories.

Our wide product range consists of hand tools & accessories, power tools accessories, garden tools, farming tools, safety equipment and paint tools.

Your Partner of Choice!

BENMAN TOOLS is a famous & fast growing tools supplier with over 40 years' experience in tool industry and deep knowledge of tools design and construction.

We produce hand tools, power tools accessories, paint tools, safety equipment and garden tools. We develop, design and test our tools after thorough market research of the needs & the demands of the professional users.

BENMAN TOOLS as a member of **FFGROUP tool industries**, has always stock availability & the warranties for the best market coverage. We always manage to succeed our goal which is the best quality in the most competitive price, making **BENMAN TOOLS** your best choice.

Quality Matters!

Top quality materials and original design solutions are the basis of the extreme practicality, effectiveness and long service life of our tools.

Our wide product range consists of hand tools & accessories, power tools accessories, garden tools, farming tools, safety equipment and paint tools.

Production of Excellence!

Following the market trends, our strategy is to develop new product lines of unique ergonomic tools and at the same time improve our existing range.

BENMAN TOOLS are produced by the most reliable factories in European Union and tested for their quality.

We design from scratch, develop and manufacture exclusively with our own molds.

We choose the best raw materials and along with the advanced production pro-

cess, the product is always ideal.

BENMAN TOOLS are made using the latest computer control machines for the thermal, mechanical and surface processing of materials and for protecting the products. The highest standards in all production levels, that company maintains, combined with the modern facilities with state-of-the-art technological equipment and the highly trained technicians ensure top quality.

Our main focus is to help the end user easily identify and select the appropriate product for his needs

Modern Packaging design

Our dedicated design department for packaging development is always up-to-date on the market's and design's trends and able to assimilate them on the packages.

The result is beautiful and practical packages, easy to place them on the stands, supporting your store's sales.

We Sale & Distribute our Products around the Globe

Providing every day the best value & quality to our customers, we build strong relationships of confidence, in local markets.

Our products are sold & distribute from our growing global sales network around the world.

We cooperate with:

- ➔ Wholesalers
- ➔ DIY chain stores
- ➔ Local Hardware stores

With impressive precision and almost zero omissions in ordering, we manage to bring the products to your door always on time

Global Network

The Right Product delivered to the Right Place at the Right Time!

The company fulfills the customers' requirements and orders with advanced logistics.

Fast and Safe Delivery

We cooperate, worldwide, with international freight forwarders & shipping companies for fast deliveries of our products

We maintain Sufficient Stock Level for all of our Products!

- ➔ Cutting edge technology in 13.000m² Logistics Center
- ➔ State of the art Electronic and Mechanical Equipment
- ➔ WMS Warehouse Management Program with Wireless Terminals
- ➔ Bar Code Scanners and Voice Picking

We give you the opportunity to exploit our warehouse, take advantage of the large stock we hold. Thus you can reduce the stock in your store and free up capital and space for new product entries.

BENMAN Cable Ties

Integrated range of cable ties covering most application areas

CERTIFICATIONS

UL94-V2

Material certification based on American quality standards

RoHS

European Union certificate under which the product does not contain banned chemicals, dangerous for the user

NYLON 6.6

Certified primary material. Nylon cables do not contain any other impure, low quality or recycled plastics. They consist of 100% high quality nylon 6.6

Free circulation in the EU

Factory certificate for proper function and for following specific production process

(Germanisches Lloyd) German Lloyd certification on the cable's mechanical properties

It is excellently manufactured from **high quality materials** to prevent breakage.

Their consistent quality has been guaranteed by the fully certified, modern production process.

High tensile strength can cope with even the most extreme installation practices, which conventional cable ties is unable to cope.

Application areas:

- Electrical panel board construction
 - Facilities
 - Automotive
 - Bodyshops
 - Workshops
- Elevator constructions

Ideal storage conditions for cable ties:

No direct sunlight

Storage in a closed plastic bag made from polyethylene

Ideal storage temperature up to 23 °C with 50% humidity

Storage without direct exposure to heat

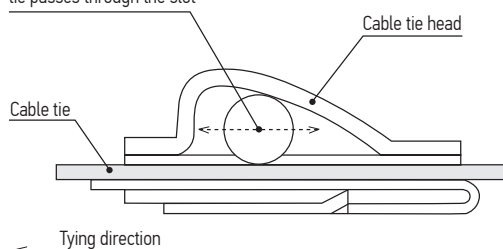

BALL LOCK STAINLESS STEEL CABLE TIES BENMAN

The ball moves freely as the tie passes through the slot

- Made from anti-magnetic stainless steel and provide solutions to several clamping problems.
- The security mechanism of the cable is constructed in accordance with the **SS316 type** of material, thus ensuring perfect closing safety in harsh corrosive conditions.
- They can withstand salts and acids.
- They are the perfect choice for indoor, outdoor, and underground applications.
- Applications in refineries and industries, automotive, signaling, railway, wind power plants, shipping, mining, drilling platforms, telecommunications.
- The operating temperatures are up to +500 °C.
